EXECUTIVE PROFILE

First-principles operator who turns high-stakes, cross-functional mandates into clear decisions, executable systems, and measurable outcomes. Experience across Tesla, Apple, and Waymo spans capacity economics, AI adoption, zero-to-one launches, and transformation.

SELECTED RESULTS 3.2x production | \$260M savings | \$156M profit | 293% growth

EXPERTISE Special Projects | Operating Strategy | Capacity Economics | AI Adoption Strategy | Decision Systems | Zero-to-One Launches

PROFESSIONAL EXPERIENCE

Tesla | Lead, Global Planning & AI Adoption Aug 2023 - Present

- Directed the global capacity and investment roadmap across three manufacturing sites, scaling production 3.2x (14.7 to 46.7 GWh), deployment 2.1x, and defining the path to 130 GWh+.
- Lead AI adoption strategy for Energy Manufacturing, turning factory and planning needs into prioritized use cases and a practical adoption roadmap.
- Generated \$156M in incremental annual profit by allocating \$23M across 50+ capacity initiatives, increasing output 8%.
- Delivered \$260M in annualized savings by leading a 12-month NPI cost-down program across materials, labor, and supplier contracts.
- Unlocked 56% capacity gains and reduced unit cost 26% by building Python and Tableau decision models for capacity, labor, automation, and factory-footprint choices.
- Mitigated \$550M in projected tariff exposure by redesigning build plans and establishing FTZ, bonded-warehouse, and product-changeover infrastructure.

Waymo | Strategy & Operations Manager Oct 2022 - May 2023

- Established the annual planning, OKR, resource-planning, and quarterly business review cadence for Engineering Operations in a safety-critical autonomous-vehicle organization.
- Unified hardware, software, fleet operations, Product, Legal, and Engineering around shared milestones and performance views, surfacing bottlenecks and tradeoffs for leadership.

Apple | Strategic Operations Program Manager Jun 2021 - Jun 2022

- Launched iPhone manufacturing in India from site and supplier qualification through line readiness and mass production.
- Enabled 293% year-over-year iPhone unit growth (4.3M to 16.9M) and 4x revenue growth (\$2B to \$10B) by translating demand into capacity and supplier-readiness plans.
- Expanded India-manufactured iPhone exports from 6 to 40+ countries, building a second-source supply chain that reduced geographic concentration risk.

Tesla | Program Manager, Special Projects Jun 2018 - Jun 2021

- Advanced Project Roadrunner from an early 4680 battery-cell pilot to a production-ready platform by establishing stage gates, readiness reviews, and cross-functional supplier coordination.
- Led production planning and vehicle operations across Fremont shops, sustaining maximum Model 3 and Model Y rates through demand surges and supply disruptions.
- Protected battery and drivetrain flow during rapid factory scale-up by designing and launching a \$3.5M/month mobile logistics platform.
