TESLA · APPLE · WAYMO · AMAZON

B.S. FINANCE · CUM LAUDE

I run capacity, cost, and special projects for Tesla Energy Megapack in Houston. Most days that's getting finance and operations onto one plan. Before this: iPhone at Apple, planning inside Waymo Engineering, and special projects at Tesla.

3.2× Tesla Energy · 14.7 → 46.7 GWh	\$260M Tesla Energy · NPI cost-down	\$156M Tesla Energy · capacity program	293% Apple iPhone · 4.3M → 16.9M

EXPERIENCE

Tesla

Mar 2026 – Present

Head of Strategic Planning and Special Projects — Megapack · Houston, TX

- Own Megapack planning and special projects from Houston: capacity, cost, and the work that doesn't sit cleanly in one function.
- Sit with finance and operations on the same capacity plan. A lot of the job is getting those two rooms to use the same numbers.

Tesla

Aug 2023 – Mar 2026

Staff Industrial Engineer → Manager, Technical Programs — Energy Manufacturing · Lathrop, CA

- Ran a 30+ person team across NPI, industrial engineering, and production planning.
- Took global Megapack capacity from 14.7 to 46.7 GWh (3.2×). Put \$23M into 50+ capacity projects; \$156M in incremental annual profit. Built the capacity and cost models in Python and Tableau.
- Ran a 12-month NPI cost-down across materials, labor, and supplier contracts. \$260M annualized.
- Redesigned the build plan and stood up FTZ, bonded-warehouse, and product-changeover infrastructure. About \$550M in projected tariff exposure taken out of the forecast.

Waymo

Oct 2022 – May 2023

Strategy & BizOps Manager — Engineering · Mountain View, CA

- Engineering Ops didn't have a planning cycle it would actually use, so I stood one up: annual plan, OKRs, resource plans, quarterly reviews.
- Hardware, software, fleet, Product, Legal, and Engineering were on separate calendars. Shared milestones meant leadership could find the bottleneck without a status hunt.

Apple

Jun 2021 – Jun 2022

Senior Strategic Operations Program Manager — iPhone · Cupertino, CA

- Worked site selection, supplier qualification, and readiness for iPhone production in India, through the climb to volume.
- On that program, units went 4.3M to 16.9M (293% year over year). Revenue \$2B to \$10B. Exports from 6 countries to more than 40.

Tesla

Jun 2018 – Jun 2021

Program Manager, Special Projects · Fremont, CA

- Took Project Roadrunner from an early 4680 pilot to a cell platform with stage gates, readiness reviews, and a single launch owner.
- Ran Model 3 / Model Y production planning through demand spikes and parts shortages, and launched a \$3.5M/month logistics program so battery and drivetrain flow held during scale-up.

Amazon

Mar 2017 – May 2018

Operations Area Manager · Patterson, CA

- Ran a shift of 100+ associates in the Patterson fulfillment center.
